## Background Information

Earthworker Cooperative brings together people to solve the social and environmental problems faced by communities and the planet. Our goal is to establish a network of worker-owned *union* businesses throughout Australia that do socially and environmentally and socially useful work. [www.earthworkercooperative.com.au](http://www.earthworkercooperative.com.au)

Earthworker Energy Manufacturing Cooperative (EEMC), based in Morwell, is one of the cooperative businesses in the Earthworker network. EEMC is a worker cooperative - a business owned and run by workers.

This role is preferable for those that are interested in becoming worker-members (co-owners) of the business in the long-term. You will be provided with extensive education towards becoming an active member of the worker cooperative.
